Dear Dr XX

Re: EXE T1D study participation, [Patient Name], NHS number []

The above patient has kindly consented to participate in our observational study (EXE-T1D) of extreme early-onset diabetes. The study includes assessment of type 1 diabetes biomarkers, including autoantibodies and C-peptide, and collecting more clinical information. We will advise their diabetes clinician of clinical results (such as HbA1c) that may inform management.

Please find enclosed the study test results performed at The Royal Devon University Healthcare NHS Foundation Trust (lead site) relating to the above patient, for your records.

Yours sincerely

Professor Richard Oram
Associate Professor in Diabetes and Nephrology
