

DIAGNOSED WITH DIABETES IN THE LAST YEAR?

AGED 30 OR OVER AT DIAGNOSIS AND ON
INSULIN?

If you can answer **YES** to the questions above, you could help us with
a new research project:

StartRight

Getting the right classification and treatment
from diagnosis of diabetes

Research purpose:

To improve diagnosis of diabetes type and so improve diabetes treatment.

Taking part will involve:

- A first appointment of 30 to 45 minutes for blood & urine samples and information about your diabetes
- Contact in 1 year & in 2 years time to update your information and to ask you to send us a urine sample.
- Another appointment in 3 years time for blood & urine samples and information about your diabetes.

Interested?

For more information, please contact the study team direct using the contact details below (or speak to your diabetes specialist nurse who can contact us on your behalf):
